

## Infusing Social, Emotional and Civic Learning into classroom practice

**Target Audience:** K-12 educators

*Are you creating a classroom climate for learning? Do students feel comfortable “not knowing” and being active and engaged learners?*

This workshop series supports classroom teachers understanding more deeply how they can use their own behavior, classroom discipline and a variety of pedagogic strategies to create a classroom climate for learning and positive youth development.

Participants will learn about:

- How your behavior can more powerfully support social, emotional and civic learning;
- How establishing norms can promote students feeling safe and engaged;
- Classroom management strategies that promote safe, orderly and engaged class behavior and learning;
- Pedagogic strategies (e.g. moral dilemma discussions; cooperative learning; conflict resolution/mediation) that further social, emotional and civic learning.

Educators will be provided with resources and tools that support this work.
